STRATEGIC PLANNING

PROCEDURE 2.3.2.1

The College periodically engages in a strategic planning cycle; College leadership determines the cycle's time frame based on available data and information. During the strategic planning process, the College's mission statement and vision statement are reviewed and revised if necessary. Annually, the Board will reaffirm the mission and vision to ensure they remain current and relevant in the interim. Key performance indicators associated with strategic planning goals will be assessed and reported annually.

The strategic goals drive the College's organization, communication and resource allocation for timeframe of the strategic plan. Individuals and teams are assigned responsibilities related to assessment of the strategic goals. At least annually, progress reports will be shared with College leadership, Board members, and campus-wide.

At the end of the strategic planning cycle, recommendations for the next strategic plan will be informed based on the achievement (or lack thereof) of the College's current goals.

Adopted: October 2020
